

MEDICARE -

ONLINE

CONSULTANCY

ABSTRACT

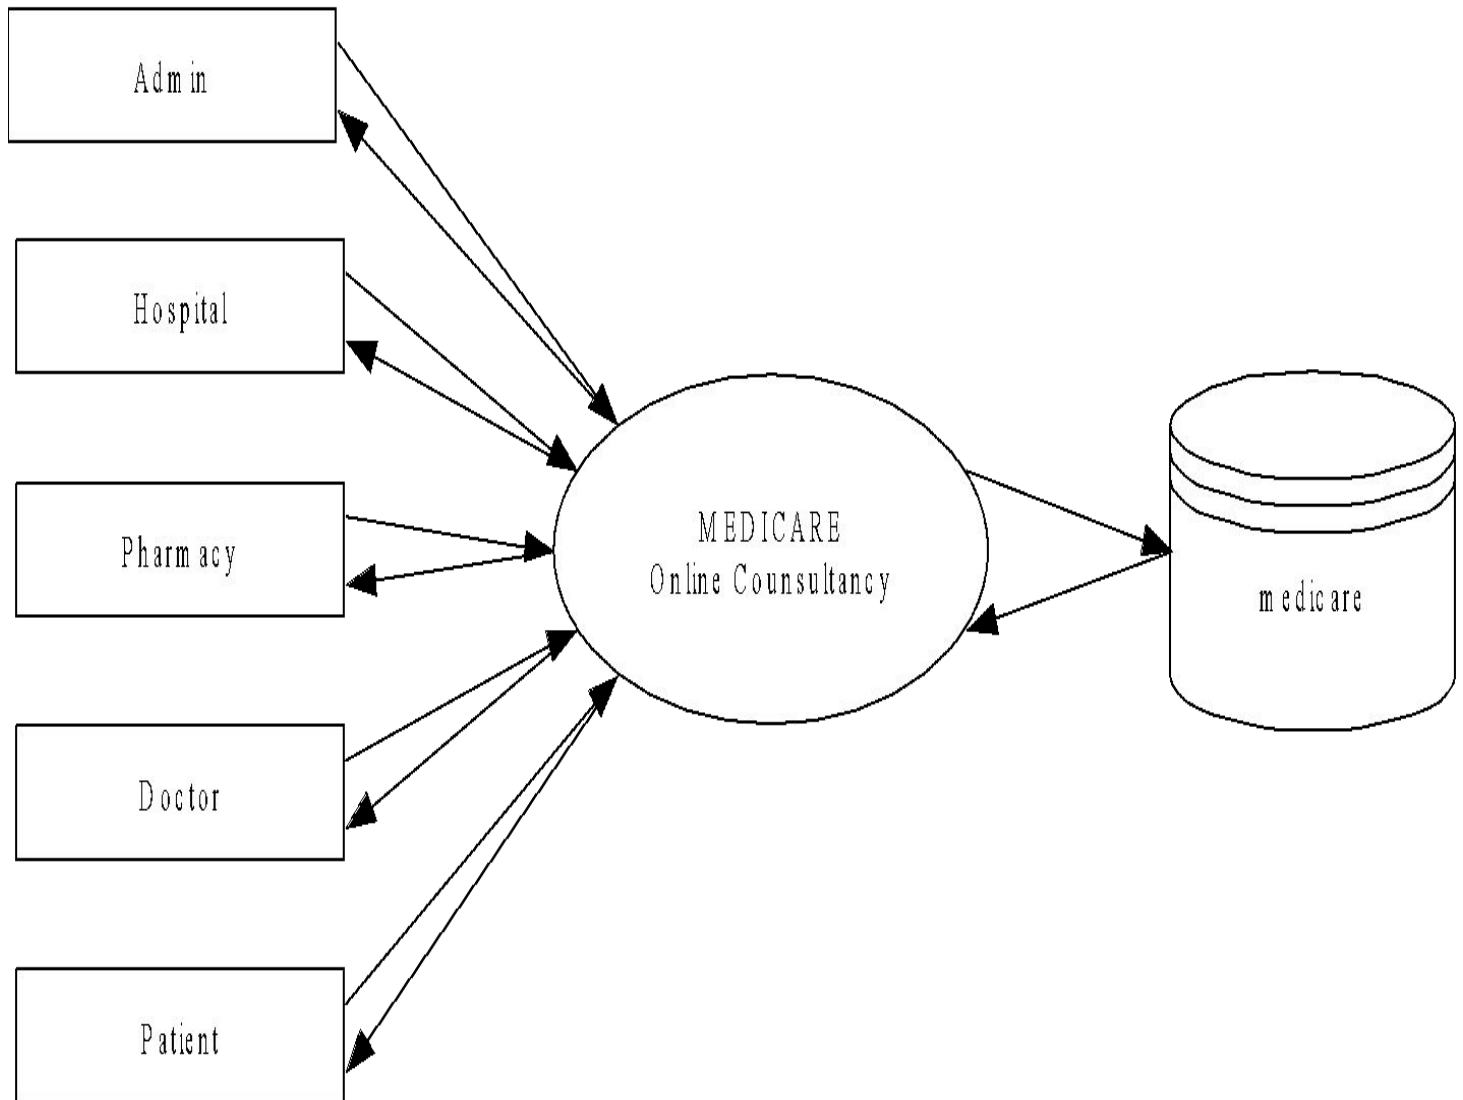

Medicare is a web-application in which customers can order their medicine by uploading the picture of prescription and get the home delivery of medicine by cash on delivery. **Medicare** solves the problem for people who live in remote areas. The people will get the service available at any time the customer can order their medicine in 2 ways: By uploading the picture of prescription and By searching for a medicine. Our aim is to provide medicine to patient's at the doorstep and aware customers for online medicine availability .

Medicare contains a medicine dictionary in which the customer can search medicine and output is generated on the basis of medicine name, content, rate, manufacturing details and also company name.

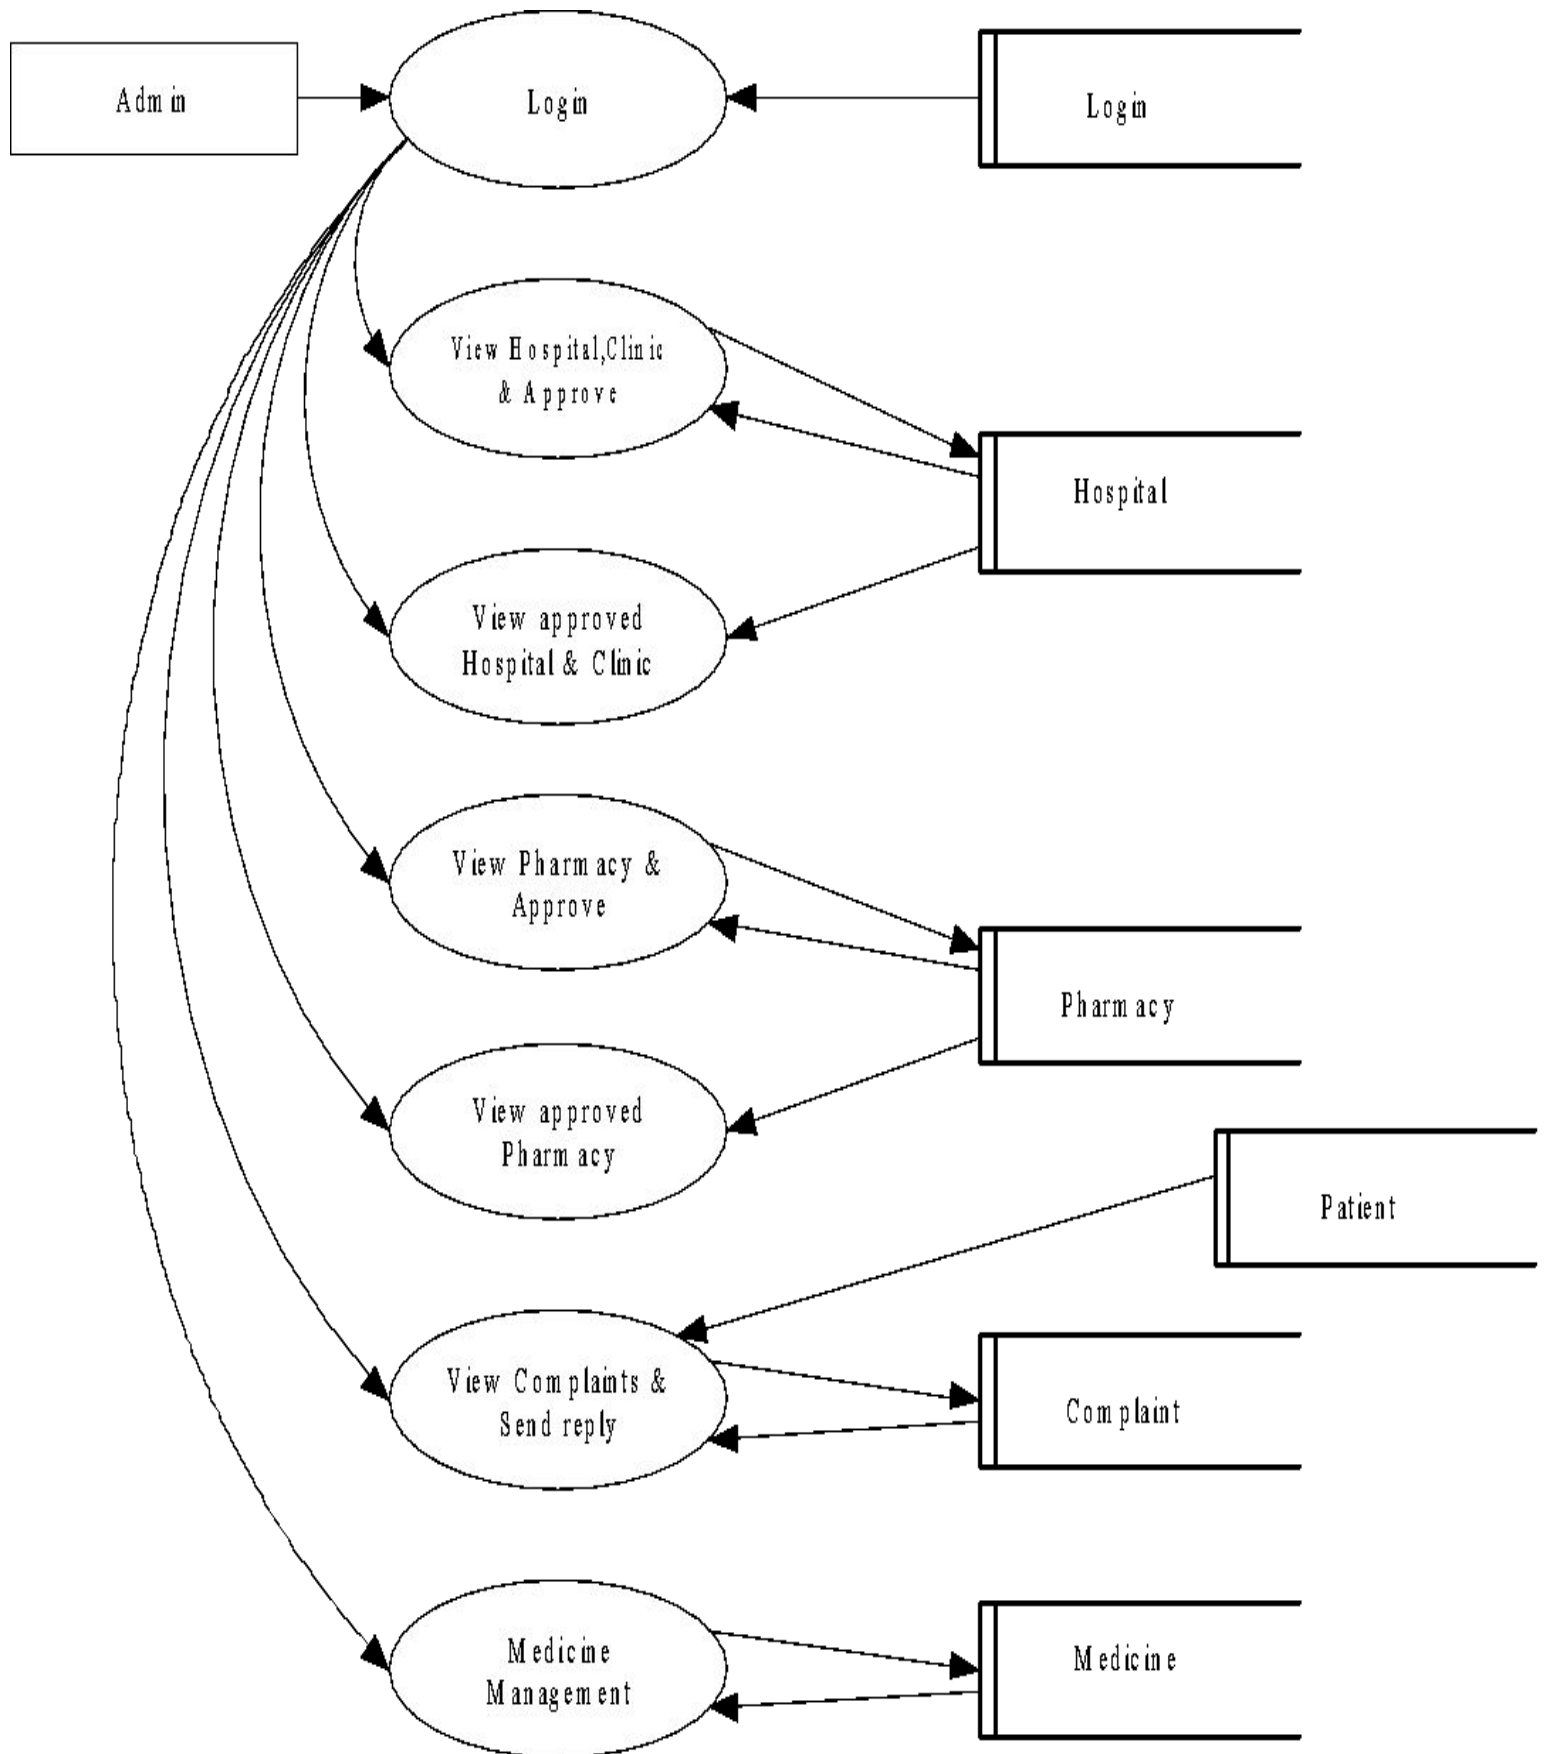

Medicare enables online consultation. It can be achieved through chatting and video conferences. It helps patients to consult doctors in the pandemic situation we are going through.
